Justification of Additional Slots for Electronics Branch, Electronics Division, Scientific Intelligence, in Support of ELINT

STATINTL

Justifications for the ☐ additional slots in Electronics Branch are as follows:

STATINTL

1. Under the general supervision of the Chief, Electronics Branch, these positions involve analysis in the general substantive area of electronics, which includes telecommunications and related fields. Each individual is responsible for one or more specific subjects such as radar, navigation aids, communications theory, semi conductors, scatter communications and other specialized scientific and technical areas; maintains and produces finished scientific and technical intelligence in critical and significant areas of foreign electronics to which he is assigned; maintains working contact and liaison with ONI, ACSI, AFOIN, ATIC, and others in this area of responsibility.

2. On a continuing basis, collates, analyzes, integrates and assesses information provided by the Electromagnetic Warfare and ELINT Branches. The results will be made available to these Branches for their guidance in collection, analysis and production. These positions also provide scientific and technical assistance to other Office of Scientific Intelligence divisions and to other components of the Agency such as FI, RR, CI and NE.

3. Minimum qualifications are as stated in HB 20-220-1 Interim Qualifications Standards for Intelligence Officer (Electronics Engineer) GS-13, GS-12, GS-11.

4. GS-4 Clerk Typist — Provides clerical and typing support to the Electronics Branch.
